NEW YORK, Oct, 24 .- A letter from correspondent of the Times in Alabams, who is vouched for by that paper as a strong Republican, says he has ridden for miles along unfrequented roads and been in all large cities, and not only failed to discover any trace of a reign of terror, but found the negroes quietly at work. The large majority given in favor of the new canon was probably secured no: by speeches or arguments during the debate, but by the explanation of the committee. The speckesn stated that the canon, while preman stated that the canon, while pre-cating a mere opinion that certain ritualistic sets and practices were of deubtful doctrine, by no means settled the question, or forbade the acts, but simply paved the way for an investigation and trial when they took place, The read hattle over Ritualism is to be fought when these cases come up for trial. The managers at Salisbury very wisely excluded all gambling establishments from the Fair Grounds. They had as many as thirty applications. But they could not control the plottpockets. EVELOPING THE PERTILITY OF THE SOIL

conditation of the wheat, or three tons of prime lay per acre.

Certain species of weeds and plants possess a wonderful power in preparing soil for the luxuriant prouts of vegetables and grain producing plants. Fartile soils hat a been formed simply by the working which the ground received by the fertilizing uniterial which was annually restored to the seed bed, when all vegetable growth returns to dust. Taking the hirt from the instructive operations of Nature, tillers of the soil can readily perceive how easily a piece of greend of ordinary fertility can be made to yield one hundred bushels of wheat, one hundred of eats, or one thousand bushels of excellent turnips. This can be accomplished by awing about four bushels of Indian corn per acre awere awere season, and n per acre twice every season, and ugling the green crops under for a few conside years —N Y Observer.
